

RECENT 'RANSOMWARE' ATTACK

Recently, a "Ransomware" program (named 'Wannacry') swept around the world, infecting over 150,000 computers with a program that encrypts and locks your data unless you pay a "ransom" (\$200 - \$500) to get the decryption key to unlock it. If you do pay, you will probably get the unlock code to decrypt your files -- but that is not guaranteed. (Can you trust an entity that would do this in the first place?) Ransomware is one more reason (and a BIG reason) to be watchful of your online behavior. The GOOD NEWS is that our SecureIT anti-virus (part of the new TECH HOME Protect plan, which is now included with our Internet service) can block Ransomware from getting to you! Ransomware is scary and can make a wrong click very expensive! Visit www.tcctechhome.com for more info.
