

TCC Total Wi-Fi

TCC's Total Wi-Fi is your ticket to the ultimate Wi-Fi experience. Choose from a free version that allows you to manage your Wi-Fi password and run speed tests on your network or the full version that gives you protection on your connected devices, parental controls, user management tools, and more!

Equipment

The Calix GigaSpire and GigaSpire Blast routers give you the best signal and performance! Plus, a Calix GigaSpire Mesh extender is included with the full version of Total Wi-Fi when needed for extra Wi-Fi range.

Manage

The basic (free) version lets you manage your Wi-Fi password and run speed tests on your network to help troubleshoot issues that may arise. The full version gives you extra controls for creating guest networks and managing connected devices.

Control

Create user profiles and control the devices and apps used by each user, along with setting time parameters and viewing online usage. These features are included with the full version.

Protect

A network-level security service that protects all of the devices connected to your Wi-Fi against threats from intrusion, known harmful websites, malicious payloads in data transfers, hacking, and more. This feature is included with the full version.

See the backside of this brochure for specific features of the free and full versions of TCC Total Wi-Fi, along with instructions for downloading and pairing TCC Total Wi-Fi with your router.

The full version is just \$14.95 per month and includes the upgraded version of the app, plus support* for your personal Wi-Fi devices to connect them to your Wi-Fi.

**Support does not include troubleshooting device-specific issues with apps or features outside of Wi-Fi connectivity. You will need to refer to the device or app manufacturer for support beyond the connection.*
